Education & Prevention Services

Who are we?

The Provincial Acquired Brain Injury (ABI) Education and Prevention Program is part of a comprehensive strategy managed by Saskatchewan Health and funded by Saskatchewan Government Insurance (SGI).

Injury prevention programs have been funded throughout the province in an attempt to prevent some of the approximately 2200 brain injuries that occur in Saskatchewan each year.

Grant Funding Opportunities

The SGI/ABI Community Grant Program was developed to enable groups to establish, enhance, and / or deliver programs that address issues in their communities related to traffic safety and injury prevention.

Our Mission

Saskatchewan communities will have access to acquired brain injury education and prevention initiatives that will promote safe lifestyle choices.

Our Goals

Prevention: To assist communities to develop effective injury prevention initiatives.

Education: To raise awareness of acquired brain injury and its effects on individuals and their families and to impart specific knowledge to individuals with acquired brain injury, their families, and caregivers.

Who can we help?

Individuals, families, professionals, organizations and community groups interested in developing or enhancing injury prevention and education initiatives.

How can we help?

The ABI Education & Prevention Coordinators may assist communities to develop, coordinate, facilitate, and evaluate education and injury prevention initiatives.

If your community has an ongoing project, we may be able to support or enhance that project in some way.

The Education & Prevention Coordinators will also research and distribute resources to communities.

Remember ... most injuries are predictable and preventable!
